

COST OF ATTENDANCE

Figuring out your expenses starts with determining the total cost of your attendance for one academic year. In addition to calculating obvious costs such as tuition, fees, room, and meal plan, you should also add estimated costs for books, personal expenses, and travel.

Cost of attendance (COA) is a federally defined term that includes both direct and indirect costs.

- **Direct costs** are what you are actually billed for by OCC and include tuition, fees, room, and meal plans (if living on campus).
- **Indirect costs** are additional expected expenses that OCC does not bill you for, such as transportation and personal expenses.

Student Financial Services reviews the average costs of each of these items every year to establish the COA that is used to create your financial aid package.

The COA varies depending upon whether a student is living on campus, off campus, or at home with family and is used to create a financial aid package.

Use the [Net Price Calculator](#) to get an estimate of the amount of financial aid you may receive.
